EXPOSURES	2019 : at WAS 10/20, vs CAR 10/27, vs SEA 11/11, vs ARI 11/17, at NO 12/08									
STRENGTHS	Mental Processing, Hands, YAC									
WEAKNESSES	Long Speed, Acceleration on Speed Release vs Press, Competitive Toughness on Opposite Field Plays or Following a Drop, Play Strength when Blocking (Power on Contact)									
SCHEME FIT	Short-to-intermediate passing scheme, taking advantage of ability to separate vs Press with solid quickness and footwork, and awareness to find voids in Zone coverage.									
PROJECTION	Backup WR you can win with, best suited for use in a short-to-intermediate passing system, to take advantage of solid release footwork and separation quickness on speed and square cut routes vs solid or slower DBs in Press or Off Man. Solid mental processing to make good route adjustments to find open areas vs Zone. Good hands, with solid tracking ability on intermediate level throws, solid concentration and good manual dexterity. Solid YAC due to solid ability to elude or break initial tackles of solid or lesser DBs. Adequate long speed on deep routes does not challenge solid or faster DBs, and can be pushed off Fade stems by DBs with solid or greater strength. Adequate downfield blocking technique once engaged. Blocking from the slot or inline from the Z, shows marginal power on contact and inconsistent effort.									
BACKGROUND	3rd year WR, who has started 8 of 46 career NFL games, and 0 of 19 in 2019. All 8 career starts came in 2018, when the 49ers suffered injuries to multiple WRs. Starts and snaps decreased in 2019, as he returned to his role as a primary backup, and the 49ers added starting WR Emmanuel Sanders. Currently in his 3rd season under HC/OC Kyle Shanahan, and 1st under WR coach Wes Welker. The 2019 49ers featured an evenly balanced (run vs pass), West Coast scheme, with heavy usage of play action, where Bourne saw a balanced mix of snaps in wide alignment (51%) and in the slot (47%), and was primarily targeted on short-to-intermediate level routes between the numbers.									
BODY TYPE / AA	Adequate height and weight, on a thin frame, with solid arm length and adequate hand size. Solid overall AA, with solid quickness, agility, balance and COD.									
POSITIVES IN PASS GAME										
Solid overall release ability, due to solid quickness, single-move footwork and head/shoulder fakes vs Soft Press, and when Jammed by solid or lesser DBs, displays solid play strength to hand-fight with a solid hand wipe or swim move, and fight to stay on the route stem. Gains solid separation with solid speed on in-breaking routes such as a Slant and Skinny Post vs solid or lesser DBs, and displays solid play strength by using his frame as a shield when cutting across the face of the DB. Against Off Man, aligned wide or in the slot, uses solid play speed to close the cushion with DBs, drive the route stem into the defender, and once in phase, displays solid hand/arm usage to aid separation on intermediate-level Dig/Out routes, and on Curl/Comeback routes, displays solid overall athletic ability to decelerate, sink hips, maintain solid balance, and solid COD to cut on the break point for the route. Against Zone shows good mental processing and awareness, particularly on inside-breaking routes (Slant/Skinny Post/Dig/Curl), to make stem adjustments according to coverage areas and take advantage of open spaces in front of LBs on short routes, and behind LBs/in front of deep Safeties on intermediate routes. On receptions, displays good ball-tracking ability, and receives with good hands, displaying good manual dexterity at various catch points, and solid body control to adjust to low throws, even when diving. Solid body control and awareness are displayed on the sideline, through solid ability to keep both feet inbounds and secure the catch. When the QB is forced to scramble and extend a play, displays solid mental processing to logically follow the direction of scramble, and solid competitive toughness to fight to get open. With the ball in his hands, shows solid YAC ability; instinctively turning upfield, using solid elusiveness and agility to stop and let a defender fly by or evade a tackler, solid balance and strength to absorb an initial hit from most DBs, solid strength to break initial tackles from similarly sized or smaller DBs, and solid competitive toughness to struggle for extra yards to convert on 3rd down.										
POSITIVES IN RUN GAME										
Solid play strength is displayed when stalk blocking smaller CBs, as he uses solid leg drive and hand placement inside the shoulders to control direction.										
NEGATIVES IN PASS GAME										
From wide alignment, on deep routes (Fade/Post/Corner), vs solid or faster DBs in Press Man, displays adequate speed release technique due to adequate acceleration, and can be pushed off his route stem by stronger DBs. Adequate long speed does not present a threat to stack and run away from solid or faster DBs in phase on deep routes. Adequate concentration creates adequate ability to catch through contact, resulting in drops or PBUs especially on Curl/Comeback routes. Adequate competitive toughness with adequate hustle on plays designed to the side of the field opposite his alignment, and when having to fight back through a defender on an underthrown ball. Adequate mental toughness is displayed following drops, with decreased effort on subsequent plays.										
NEGATIVES IN RUN GAME										
Adequate overall as a blocker, due to adequate ability to seal-off smaller defenders on outside runs, and marginal power on contact when blocking inside from the Slot or Z alignment. Missed blocks occur as a result of inconsistent effort vs quicker defenders.
