SCHEME FIT		4-3 or Hybrid front as the 6/7/9-tech on early downs and kicking inside to 4/5-tech in Sub packages.								
PROJECTION		Starting 4-3 DE or rotational 4/5-tech DE you can win with in 4-3 Base/Hybrid front that can utilize his Upfield Burst and PR Technique on 3rd down as well as his Technique vs Run and Competitive Toughness as a Contain/Force defender on 1st & 2nd down. Lacks the AA to contribute as a 3rd down Edge or 3-4 OLB dropping into coverage and the Play Strength vs Base/DBL Team blocks as an IDL on early downs, best fit as a pass rush specialist on a contending team that can use his Competitive Toughness on critical downs.								
BACKGROUND		3rd year DL with 12 starts including 8 of 16 in 2019 (and 3 of 3 in the playoffs, including a Super Bowl victory) and no injuries; 3rd year under HC Andy Reid and 1st with D-Line coach Brendan Daly in DC Steve Spagnuolo's attacking, Hybrid-front defense. Began the season as a rotational Edge Rusher before earning a starting spot in an evolving role, transitioning from the primary 6/7/9-tech with limited interior pass rush opportunities to a predominantly 4/5-tech DE on passing downs with increased success.								
BODY TYPE / AA		Very good height with solid weight/arm length and very good hand size, long frame with narrow hips and wiry muscle build. Adequate athletic ability with good upfield burst, solid balance and an adequate combination of quickness/agility/COD/foot speed/flexibility.								
POSITIVES IN PASS GAME										
Good upfield burst out of 3/4-point stance, shows good explosion/acceleration with solid processing to key the ball, able to cover 4 yards in 3 steps and vertically pressure OL with good quickness/footwork. After the snap, shows solid processing on the fly to diagnose and react vs Play-Action and Screens, solid PR plan with a mix of Power/Finesse moves, good Bull rush when his legs are fresh, very good UOH striking the chest plate with good force to get vertical lift, able to consistently push OL with good size/anchor ability into the QB's lap, good Finesse PR moves with very good hand combat skills and good chop/swipe moves, when he gets around OL has good closing speed to reach the QB. Good on stunts/twists as the penetrator with good physicality engaging OL to open pass rush lanes. Very good effort/motor in pass rush, plays through the whistle for all 4 quarters with very good aggressiveness in pursuit and in QB contain, very good mental toughness on critical downs, raises his level of play and effort/motor regardless of fatigue on 3rd/4th downs, Red Zone/Goal Line and End of Half/Game situations displaying his best overall physical/mental toughness in the playoffs and late in the Super Bowl by splitting DBL teams and generating interior pressure on pivotal, game-deciding drives.										
POSITIVES IN RUN GAME										
Good upfield burst vs Gap/Zone runs, shows solid ability to key the ball and diagnose vs Run with good acceleration/aggressiveness to shoot Gaps. Good setting the edge vs Outside Zone, Stretch and Toss plays, shows solid pad level and solid balance to absorb initial contact, very good UOH with solid length and good upper body strength to disrupt/lockout and good core strength to shed, able to consistently force ball carriers inside and stay disengaged vs OL/TE's with good play strength and solid length. Solid in short area pursuit, shows solid ability to track the ball carrier in traffic with good closing speed and good arm strength making 1-arm tackles.										
NEGATIVES IN PASS GAME										
Adequate pass rusher off the edge, shows adequate foot speed/quickness/agility/initial stride length to run the arc or set-up inside/outside PR moves with adequate ability converting speed-to-power, adequate flexibility/hip fluidity in all phases of pass rush, plays stiff after his initial burst with adequate bend to turn the corner when unable to beat OL to the spot. Adequate quickness to engage QB's with very good elusiveness outside the pocket, when he does reach QB's, does not attack the ball and is unlikely to create strip sacks. On stunts/twists, struggles to reach pass rush lanes as the loopier. In Man/Zone coverage, struggles to stay with WR/TE's and consistently operate in space due to adequate AA. Adequate stamina, shows fatigue at the end of long drives or when playing a large percentage of snaps with deteriorating quickness/agility and PR plan, relies on Bull rush with reduced effectiveness vs pass on non-critical downs, will benefit from a healthy DL rotation and should not be counted on to lead his team in total snaps.										
NEGATIVES IN RUN GAME										
Adequate A/B gap integrity when playing inside, takes adequate attack angles vs Base/DBL team blocks leading to diminished leverage, struggles to recover and close his gap when knocked off balance by DBL teams or OL with very good size/strength. Adequate pursuit range, struggles in backside pursuit vs outside runs.
